

DVR User Manual

DIGITAL VIDEO RECORDER

T Series / S Series / H Series

1. Overview

1.1 Notice

This User's manual provides Information for using DVR such as brief introduction, part names, functions, connection to other equipment, menu setup, and the like. You have to keep in mind the following notices:

- Manufacturer retains the copyright on this manual.
- This manual cannot be copied without Manufacturer's prior written approval.
- Manufacturer is not liable for any or all losses to the product incurred by your use of non-standard product or violation of instructions mentioned in this manual.
- If you want to open the case of your system for checking problems, please consult the expert from the shop where you bought the product.
- Before installing an additional HDD or connecting an external storage device (USB memory or USB HDD) to this DVR check the compatibility list.

1.2 Caution

Please be aware of the following precautions before installing the DVR

- Avoid positioning the DVR in any place where the unit may come into contact with moisture, dust, or soot.
- Avoid placing in direct sunlight or near heating appliances.
- Keep the product away from electric shock or magnetic substances.
- Avoid temperature extremes (recommended operation temperature is between 0°C and ~40°C).
- Do not place any conductive material through the ventilation grills.
- Keep the system turned off before installation.
- Ensure enough space is left for cable connections.
- Place the system on a solid surface with sufficient air ventilation. Avoid any surface that vibrates.
- Placing the system near electronic devices such as radio or TV may cause breakdown to the product.
- Do not disassemble the product without seeking assistance from manufacturer.
- Do not place any heavy object on the system.

1.3 Safety Warnings and Cautions

Warning and Caution Signs

 Warning If you are not aware of this warning, you may be seriously injured or be killed	 Caution If you are not aware of this warning, you may be injured or cause property loss
--	--

 Warning	
<p>Turn off the system before installing the system. Do not plug in several electric devices to the same outlet.</p> <ul style="list-style-type: none">• This may cause heating, fire, or electric shock. 	<p>Do not place any liquid container on the system, such as water, coffee, or beverage.</p> <ul style="list-style-type: none">• If liquid is poured onto the system, it can cause a system breakdown or cause fire. 
<p>Prevent power cable from being severely bent or pressed by a heavy object.</p> <ul style="list-style-type: none">• This may cause fire. 	<p>Clean the dust around the system on regular basis. When cleaning the system, always use dry cloth. Do not use wet cloth or other organic solvents.</p> <ul style="list-style-type: none">• This may damage the surface of the system and can cause system breakdown or electric shock. 
<p>Avoid any place with moisture, dust, or soot.</p> <ul style="list-style-type: none">• This can cause fire or electric shock. 	<p>When pulling the power cable from the plug, do so gently. Do not touch the plug with wet hands and avoid using the plug if the holes on the outlet are too loose.</p> <ul style="list-style-type: none">• This may cause fire or electric shock. 

Warning

Do not attempt to disassemble, repair, or modify the system on your own. It is extremely dangerous due to high voltage running through the system.

- This may cause fire, electric shock, or serious injuries.

Install the system in a cool place without direct sunlight and always maintain room temperature. Avoid candle light and heat-generating devices such as heater. Keep the system away from places where many people pass.

- This may cause fire.

Check for any danger signs such as moist floor, loosened or damaged power cable, or unstable surface. If you encounter any problems, ask for assistance from your dealer.

- This may cause fire or electric shock.

Install the system on a plain surface with sufficient air ventilation. Do not place the system on elevated surface.

- This may cause system breakdown or serious injuries.

Keep at least 15cm between the back of the system and a wall for the cables connected into the system. Otherwise, cables may be bent, damaged, or cut.

- This may cause fire, electric shock, or injuries.

The power outlet must be placed on a ground, and the voltage range must be within 10% of the voltage rate. Do not use the same outlet with a hair dryer, iron, refrigerator, or any heating appliances.

- This may cause fire, heating, an electric shock.

Warning

If the system's HDD has exceeded its life span, you may not be able to recover any data stored inside the HDD. If the video on the system screen appears 'damaged' while playing a recording stored inside the system's HDD, it must be replaced with a new one. Ask for an engineer's assistance for HDD replacement from your dealer.

- Manufacturer is not responsible for deleted data caused by user's mishandling.

When the system's battery is depleted, you must change it with the same or equivalent type of battery specified by the manufacturer. Depleted batteries should be discarded according to manufacturer's instructions.

- This may cause an explosion.

Caution

Do not install the system in a place with high magnetic, electric wave, or wireless devices such as radio or TV.

- Install the system in a place without magnetic objects, electric frequencies, or vibration.

Install the system in a place with appropriate moisture and temperature level.

- Avoid installing the system with high (over 40°C) or low (under 0°C) temperature.

Prevent any substances from being inserted into the system.

- This may cause system breakdown.

Do not place any heavy object on the system.

- This may cause system breakdown.

Install the system in a place with sufficient air ventilation.

- Keep at least 15cm distance between the back of the system and a wall, and at least 5cm distance between the side of the system and a wall.

Install the system on a stable and leveled surface..

- The system may not operate properly.

Caution

The system can be damaged from a strong impact or vibration. Avoid throwing objects within the vicinity of the system.

The outlet must be placed on the ground.

Avoid direct sunlight or any heating appliances.

If there is strange sound or smell, unplug the power cable immediately and contact the service Center.

- This may cause fire or electric shock.

Ventilate the air inside the system operation room, and tighten the system cover firmly.

- System breakdown may be caused by inappropriate environment.

In order to maintain stable system performance, have your system checked regularly by the service Center.

- Manufacturer is not held responsible for system breakdown caused by user's mishandling.

It is recommended to use AVR (Automatic Voltage Regulator) for stable power supply.

It is recommended to coil the core-ferrite around the connector of the system to avoid electromagnetic interference.

1.4 Equipment

Please check to make sure the following equipment are included when you purchased DVR

(The user manual will be included either inside the product software CD or a quick Manual including important contents.)

1.5 Front Panel (8CH,16CH Model)

[1. DVD-RW]

[2. Jog Shuttle]

[3. LED Status]

- POWER
- REC
- NETWORK
- KEYLOCK
- AUDIO

[4. Camera Channel]

[5. Split Screen Buttons]

- AUTO SEQ : Automatic channel sequence
- 4-split : 4-splitscreen
- 9-split : 9-splitscreen
- 16-split : 16-splitscreen
- MENU : Menu screen

[6. Function Buttons]

- PANIC : Panic mode
- KEYLOCK : Keylock mode
- PTZ : PTZ mode
- BACKUP : BACKUP mode
- ESC : Return to previous mode

[7. Playback Control Buttons]

- Rewind playback
- Playback the previous video
- Pauses playback
- playback(Calendar search)
- Playback the next video
- Forward playback

[8. Directional move buttons]

[9. USB port]

- 2 Port

1.6 Rear Panel (SD Model)

[1. Camera Video Input]
- 1~16 Port

[2. Loop Through Output]
- 1~16 Port

[3. Main Monitor(CVBS)]

[4. Multi-Spot(CVBS)]

[5. Power Connector]
- AC Input

[6. Audio Input]
- 1 ~ 16 Port

[7. Alarm In Port]
- 1~16 Port (G: Ground)

[8. Alarm Out Port]
- 1 ~ 16 Port (G: Ground)

[9. RS-485/422]
- RS-485 : A, B, G
- RS-422 : A, B, Y, Z

[10. USB Port]
- 2 Port

[11. E-SATA Port]

[12. Network Port]

[13. HDMI Port]

[14. VGA Port]

[15. Audio Out]

1.7 Rear Panel (HD Model - 16Ch)

[1. Power Connector]
- AC Input

[2. Camera Video Input]
- 1~16 Port

[3. E-SATA Port]

[4. VGA Port]

[5. HDMI Port]

[6. USB Port]
- 2 Port

[7. Network Port]

[8. Audio Input]
- 1~16 Port

[9. Alarm In Port]
- 1~16 Port (G: Ground)

[10. Alarm Out Port]
- 1~16 Port (G: Ground)

[11. RS 485/422]
- RS-485 : A, B, G
- RS-422 : A, B, Y, Z

[12. Main Monitor(CVBS)]

[13. Audio Out]

1.8 Rear Panel (HD Model - 8Ch)

[1. Power Connector]
- AC Input

[2. Camera Video Input]
- 1~8 Port

[3. E-SATA Port]

[4. VGA Port]

[5. HDMI Port]

[6. USB Port]
- 2 Port

[7. Network Port]

[8. Audio Input]
- 1~8 Port

[9. Alarm In Port]
- 1~8 Port (G: Ground)

[10. Alarm Out Port]
- 1~8 Port (G: Ground)

[11. RS 485/422]
- RS-485 : A, B, G
- RS-422 : A, B, Y, Z

[12. Main Monitor(CVBS)]

[13. Audio Out]

1.9 Front Panel (4 CH Model)

[1. LED Status]

- POWER
- REC
- NETWORK
- KEYLOCK
- AUDIO

[2. USB port]

- 2 Port

1.10 Rear Panel (4CH Model)

[1. Main Monitor(CVBS)]

[2. Audio Output]

[3. Audio Input]
- 1 ~ 4 Port

[4. VGA Port]

[5. Network Port]

[6. Alarm In Port/Alarm Out / RS-485]
- Alarm In : 1 ~ 4 Port, G
(G : Ground)
- Alarm Out : Com, NC, NO
- RS-485 : G, A, B

[7. Camera Video Input]
- 1 ~ 4 Port

[8. HDMI Port]

[9. USB Port]
- 1 Port

[10. Power Connector]
- DC 12V

1.11 Rear Panel (8CH Model)

[1. Main Monitor(CVBS)]

[2. Audio Output]

[3. Audio Input]
- 1 ~ 4 Port

[4. E-SATA Port]

[5. Network Port]

[6. Alarm In Port/Alarm Out / RS-485]
- Alarm In : 1 ~ 4 Port, G
(G : Ground)
- Alarm Out : Com, NC, NO
- RS-485 : G, A, B

[7. Camera Video Input]
- 1 ~ 8 Port

[8. VGA Port]

[9. HDMI Port]

[10. USB Port]
- 2 Port

[11. Power Connector]
- DC 12V

1.12 Remote Controller

[Note]

- Usage of a remote controller is same the front panel keys.
- To select camera or Audio 10~16, press 10+ button followed by the 1 ~ 6 buttons.
- Follow the procedure below when using the remote controller for multi DVRs.
 - Check System ID(between 1 and 16) of the DVR that wish to use.
 - Holding up the remote controller to face towards the DVR and press the System ID numbers one by one, while pressing ID button on the remote controller. Note that the System ID is 2-digit number. Button '10' functions the same as '0'.

- **By Event**
 - Displays the event search menu

2.3.2 Cam Adjust (Only for 960H/SD Models)

 PTZ	
 Cam Adjust	Color
 Alarm Out	Cam Adjust
 Lock	

- **Color**
 - Displays the color adjust menu
- **Cam Adjust**
 - Displays the camera adjust menu

2.3.2.1 Color (Only for 960H/SD Models)

- **Brightness**
 - Adjust the Brightness value
- **Contrast**
 - Adjust the Contrast value
- **Saturation**
 - Adjust the Saturation value
- **Hue**
 - Adjust the Hue value
- **Apply to all**
 - Applies the current setup to all cameras
- **Default**
 - Initializes the setup to default value (Brightness : 0, Contrast : 85, Saturation : 130, Hue : 0)

2.3.2.2 Camera (Only for 960H/SD Models)

- **H Sync**
 - Adjust the H Sync value
- **V Sync**
 - Adjust the V Sync value
- **Apply to all**
 - Applies the current setup to all cameras
- **Default**
 - Initializes the setup to default value (H Sync : 4, V Sync : 19)

2.3.3 Alarm Out

- **Alarm output channel number**
 - Select the alarm output number
- **Buzzer**
 - Turn on the buzzer

2.3.4 PTZ

- **PTZ**
- Go to PTZ mode

- **Pan/Tilt**
- Direction buttons for movement

- **M**
- Enter into camera OSD menu
(Only for POC or COC Models)

- **Zoom**
- Zoom In / Out

- **Focus**
- Focus Near / Far

- **Iris**
- Iris Open / Close

- **LED ON, OFF**
- Turn On/Off LED
(Only for POC or COC Models)

- **Preset No**
- Set Preset number for memory & go to

- **Go to Preset number**
- Go to preset number

- **Memorize Preset position**
- Memory current position to preset number

- **Pan/Tilt Speed**
- Pan (Left/Right) / Tilt (Up/Down) speed
- Range is 1 ~ 10

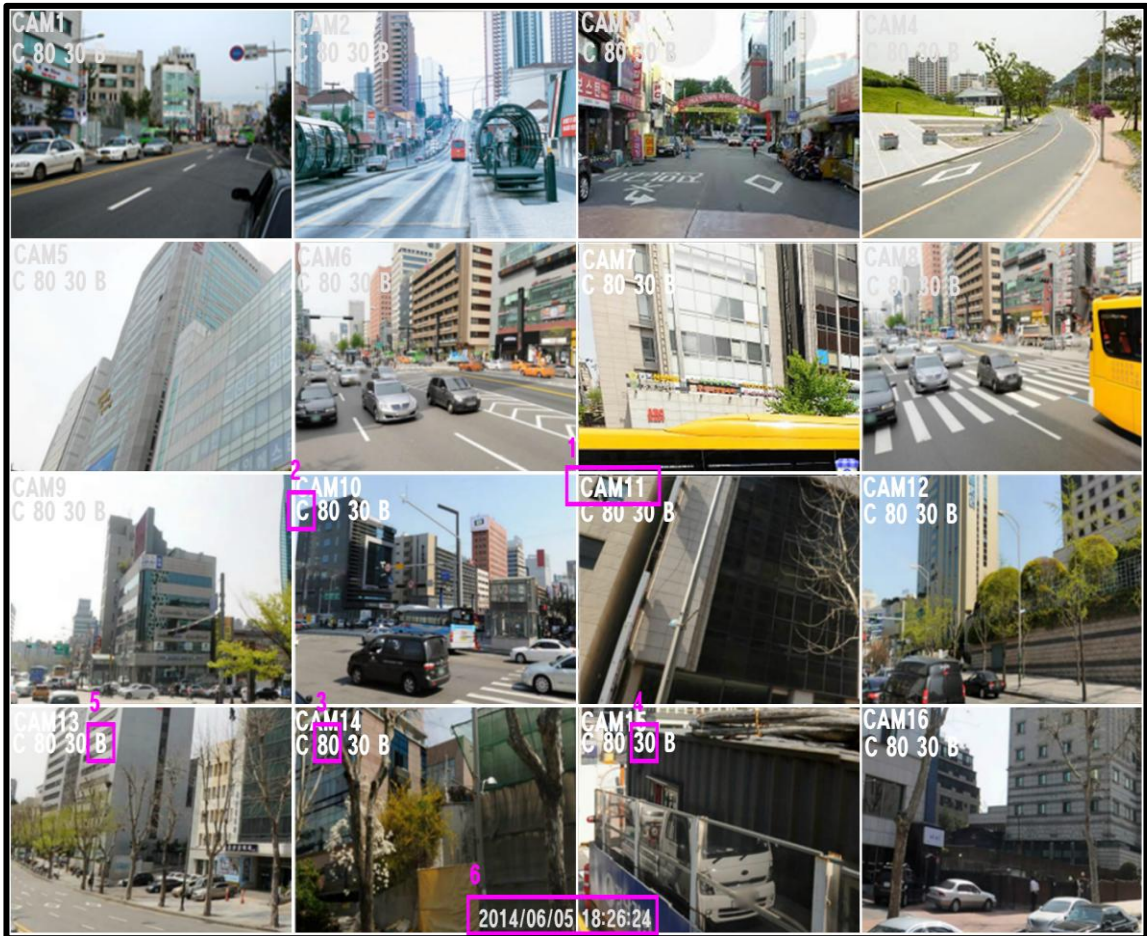

- **Close window**
- Close PTZ window

- **Exit**
- Exit PTZ mode and return to Live mode

3. Playback

3.1 Playback

[1. Camera name]

- Displays the current camera name.

[2. Recording mode]

- C – Continuous recording mode.
- M – Motion recording mode.
- A – Alarm recording mode.

[3. Video quality]

- Displays the video quality.

[4. Frame rate]

- Displays the frame rate per sec

[5. Recording quality]

- B – Best
- H – High
- M – Moderate
- E – Economic

[6. Date/Time]

- Displays the date/time

3.1.1 Play Back Zoom

1. Change screen to 1 full screen mode.
2. Draw rectangle by dragging mouse left button pressed.
3. Double click to unzoom

3.2 Popup Bar

▪ 1-split screen

- Displays 1 channel screen mode

▪ 4-split screen

- Displays 4 channel screen mode

- Select a backup device, USB memory or CD/DVR-R

[Save as]

- Set the backup file name.

[Camera]

- Select the channel to backup

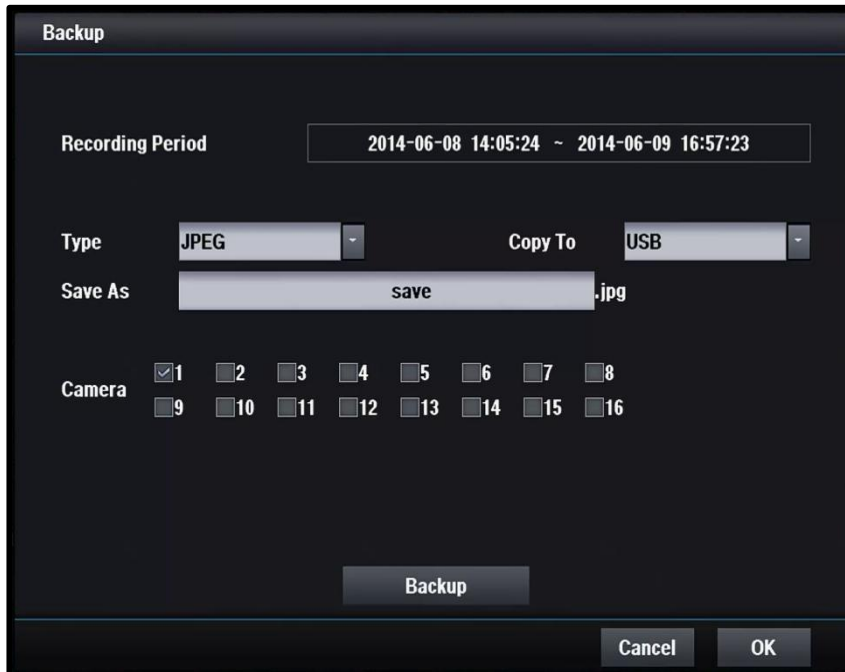

[Estimate]

- Check the size of the selected data and free space

[Do backup]

- Starts backup.

3.3.1.2 JPG Backup

[JPG Backup]

- Save current background image as JPG format

[Period]

- Set the start/end date and time.

[Copy to]

- Select a backup device, USB memory or CD/DVR-R

[Save as]

- Set the backup file name.

[Camera]

- Only 1 camera should be selected at the same time
- Only cameras existed in a current background split mode are available

[Do backup]

- Starts backup.

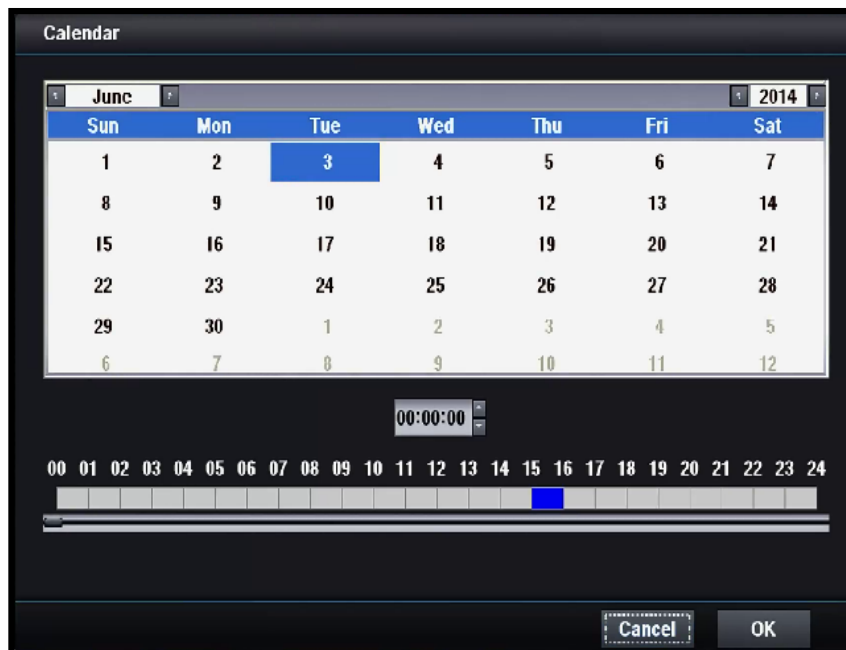

3.3.2 Bookmark search

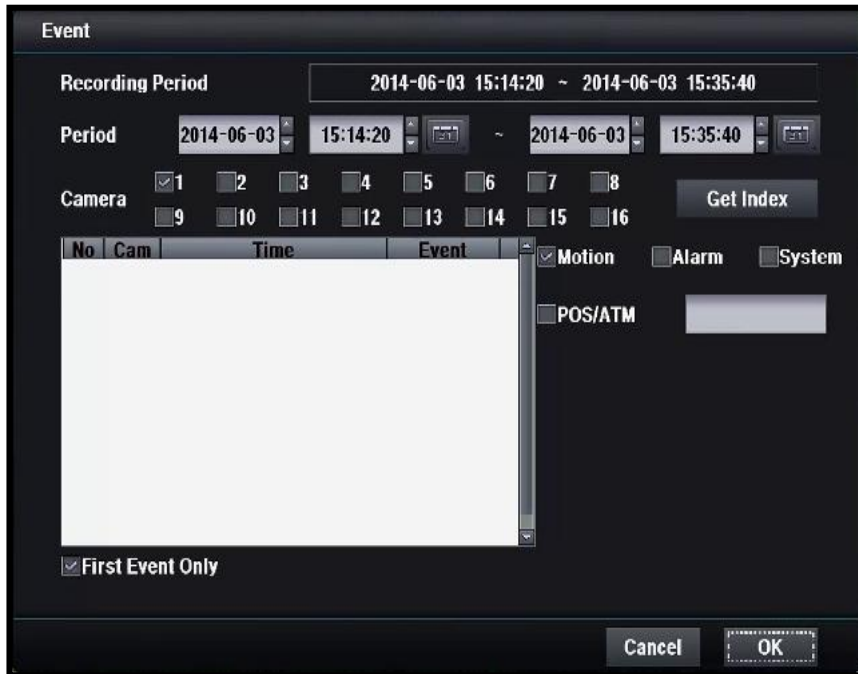

[Recording Period]

- Displays the recorded period.

3.3.3 Calendar search

3.3.4 Event search

[Recording period]

- Set the recorded period.

[Period]

- Set the start/end date.

[Camera]

- Select the channel for event search

[Index]

- Select the recording data on the event list.

[Motion]

- Select the motion for motion event search.

[Alarm]

- Select the alarm for alarm event search.

[System]

- Select the system for system event search.

[POS/ATM]

- Search POS/ATM by keyword

[First event only]

- Load only the first frame of each new event

- Set the Transmission Method

STEP 5.

The screenshot shows a configuration window titled "Day Light Saving". It contains several input fields and a "Check" button. The fields are: "DDNS Server Type" (a dropdown menu with "nsddns.org" selected), "Auto Sync" (an unchecked checkbox), "DDNS Server" (an empty text box), "DDNS Port" (a text box containing "9438"), "User Domain Name" (an empty text box), "System Domain Name" (an empty text box), "User" (an empty text box with a mouse cursor over it), "Password" (an empty text box), and "Key" (a long empty text box). At the bottom, there are three buttons: "Prev", "Check", "Cancel", and "OK".

[DDNS Server Type]

- Set the DDNS Server Type
- Needed to register only when use user defined DDNS server
- Available DDNS servers
 - nsddns.org, dyndns.org, no-ip.com., zoneedit.com, freedns.afraid.org

[DDNS Server]

- Enter the DDNS Server address

[DDNS Port]

- Enter the port number to access to the DDNS server
- The default port is 9438

[User Domain Name]

- Enter the User Domain Name

[System Domain Name]

- Enter the System Domain Name

[User]

- Enter the User ID to access to the DDNS server

[Password]

- Enter the User password to access to the DDNS server

[Key]

- Need the connection certificate key value if use the freeDNS

[Do Check]

- Verify availability of DDNS server setting

4.1.2 Recording

STEP 1.

The screenshot shows a dark-themed settings dialog box with the following fields and controls:

- Time Zone:** A dropdown menu showing "UTC+09:00 Seoul, Tokyo".
- Language:** A dropdown menu showing "English".
- Date:** A text input field showing "2014-06-03".
- Date Format:** A dropdown menu showing "YYYYMMDD".
- Date Separator:** A dropdown menu showing "/".
- Time:** A text input field showing "15:27:47".
- Time Format:** A dropdown menu showing "12 HOURS".
- Day Light Saving:** A checkbox that is currently unchecked.
- Buttons:** A "Setting ..." button, a "Cancel" button, and a "Next" button.

[Time Zone]

- Set the time zone.

[Language]

- Set the language to use.

[Date]

- Set the current date.

[Date Format]

- Select the date display format.

[Date Separator]

- Set the separator come between year-month-date

[Time]

- Set the current time.

[Time Format]

- Select the time display format.

[Day Light Saving]

- Set the day light saving for the applied countries.

STEP 2.

4.2 System

4.2.1 General

4.2.1.1 Date/Time Setting

The screenshot shows a 'Date/Time Setting' dialog box with the following fields and options:

- Time Zone:** UTC+09:00 Seoul, Tokyo
- Language:** English
- Date:** 2014-06-03
- Date Format:** YYYYMMDD
- Date Separator:** /
- Time:** 15:27:47
- Time Format:** 12 HOURS
- Day Light Saving:**
- Buttons:** Setting ... (disabled), Cancel, Next

[Time Zone]

- Set the time zone.

[Language]

- Set the language to use.

[Date]

- Set the current date.

[Date Format]

- Select the date display format.

[Date Separator]

- Set the separator come between year-month-date.

[Time]

- Set the current time.

[Time Format]

- Select the time display format.

[Day Light Saving]

- Set the day light saving for the applied countries.

The screenshot shows a 'Day Light Saving' dialog box with the following fields and options:

- Start:** FEB 1st SUN
- Finish:** AUG 1st SUN
- Buttons:** Cancel, OK

4.2.1.2 Video

[Video Type]

- Show Video Type.

[VGA Resolution]

- Set the VGA output resolution.
1920X1080 P60, 1920X1080 P50, 1920X1080 I50, 1920X1080 P30,
1440X900 @60Hz, 1366X768 @60Hz, 1280X800 @60Hz, 1024X768 @60Hz

[Video Input Type]

- Shows video input type from CH01 ~ CH16.
- Only for HD-SDI Models
- Only HD channels are showed for hybrid models

4.2.1.3 Storage

[When HDD is full]

- Overwrite
 - Keep recording after deleting older data.
- Stop
 - Stop recording.

[Erase All Data]

- Erase all the HDD data

[RAID]

- Raid 1
 - Raid 1 means mirroring, which store same data to every 2 HDDs
 - HDD1 and HDD2 (HDD3 and HDD4 ...) have same data.
 - If one of two HDD fails, the other one has data safely.
 - HDD capacity use 50 % of total HDD capacity
- Raid 5
 - Raid 5 stores data to every 3 HDDs
 - If one of three HDD fails, the other two HDDs has data safely.
 - HDD capacity use 66 % of total HDD capacity

We strongly recommend you use RAID1!

4.2.1.4 Update

4.2.1.4.1 Firmware Update

[Current Version]

- Shows current DVR version

[USB Memory]

- Shows version of the USB memory

[Update]

- Update current version to new version of USB memory.

[Advanced]

- Update kernel

4.2.1.4.2 Kernel Update

[Type]

- Select kernel

[Time]

- Shows current kernel information installed

[USB Memory]

- Shows version of the USB memory

[Update]

- Update current version to new version of USB memory.

4.2.1.5 Admin

The screenshot shows the Admin configuration page with the following settings:

- DVR ID:** 0
- DVR NAME:** (empty text field)
- Auto Logout Time:** Not Used
- P60 Recording:**
- Auto Restart:** Not used

[DVR ID]

- Select the DVR ID which is used for remote controller. For remote controller, DVR id and remote controller's is should be same.

[DVR Name]

- Set the DVR Name.

[Auto Logout Time]

- Login status is valid during the period of auto logout time
- You don't need to login whenever you try to enter setup and so on
- Not Used / 1 Min / 5 Min / 10 Min / 30 Min / 60 Min are available

[P60 Recording]

- Enable/Disable P60 Recording
- If enabled, 60 fps setting is allowed on recording setting page

[Auto Restart]

- Reboot system according to user setting
- Not used : Disable auto restart(Default)
- Daily : You can select restart time by 30 minutes interval
- Weekly : You can select restart time by weekday & 30 minutes interval
- Monthly : You can select restart time by day & 30 minutes interval

4.2.2 Account

4.2.2.1 New Group

The screenshot shows a 'New Group' dialog box with the following elements:

- Navigation tabs: New Group, Edit Group, New User, Edit User, Checking.
- Group Name: A text input field with an 'Add' button.
- Permissions list (all checked):
 - Setup
 - Playback
 - Network
 - Backup
 - Shut down
 - Lock
- Camera for Network (all checked):
 - 1 2 3 4
 - 5 6 7 8
 - 9 10 11 12
 - 13 14 15 16
- Buttons: Cancel, OK.

[Group Name]

- Type new group name

[Permission]

- Select the Setup / Playback / Network / Backup / Shutdown / Lock
- Select the permissions for the edited group.

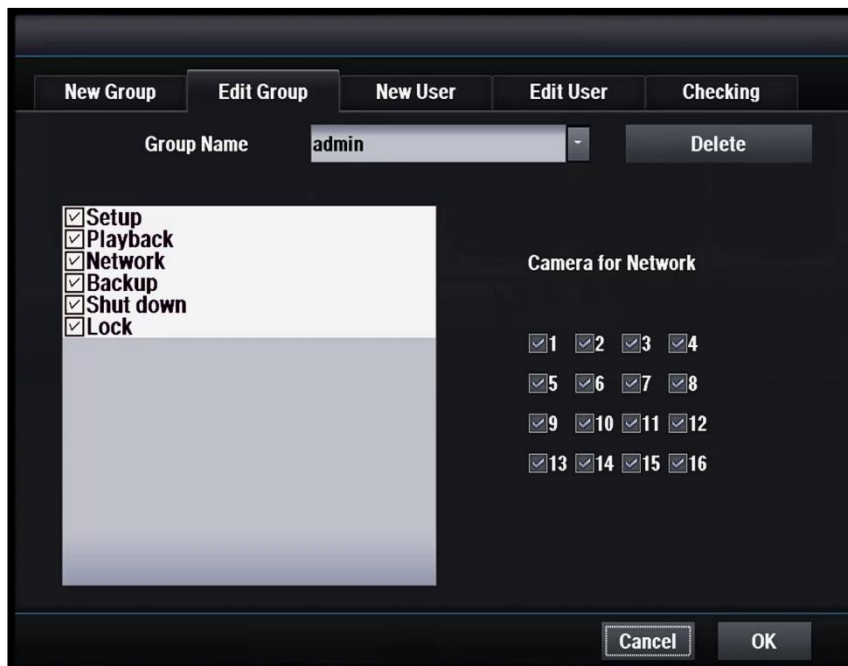

[Add]

- Add new group with new permissions
- Maximum number is 8

[Camera for Network]

- Select the cameras privileged for network

4.2.2.2 Edit Group

[Group Name]

- Select the group name to edit.

[Permission]

- Select the Setup / Playback / Network / Backup / Shutdown / Lock
- Select the permissions for the edited group.

[Delete]

- Delete the selected group name.

[Camera for Network]

- Select the cameras privileged for network

4.2.2.3 New User

The screenshot shows a 'New User' dialog box with the following fields and controls:

- User Name:** A text input field and an **Add** button.
- Group Name:** A dropdown menu with 'admin' selected.
- Password:** A text input field.
- Confirm:** A text input field.
- Buttons:** **Cancel** and **OK** buttons at the bottom right.

[User Name]

- Enter new user name.

[Group Name]

- Select the group name for new user.
- User is allowed to use each group permission.

[Password]

- Type password

[Add]

- Add new user

4.2.2.4 Edit User

The screenshot shows a dialog box with the following elements:

- Tabbed interface: **New Group**, **Edit Group**, **New User**, **Edit User** (selected), **Checking**
- User Name**: dropdown menu showing "admin", with a **Delete** button to its right.
- Group Name**: dropdown menu showing "admin", with a **Modify** button to its right.
- Old Password**: empty text input field.
- New Password**: empty text input field.
- Bottom right: **Cancel** and **OK** buttons.

[User Name]

- Select user you want to edit

[Group Name]

- Select new group you want

[Modify]

- Modify user setting

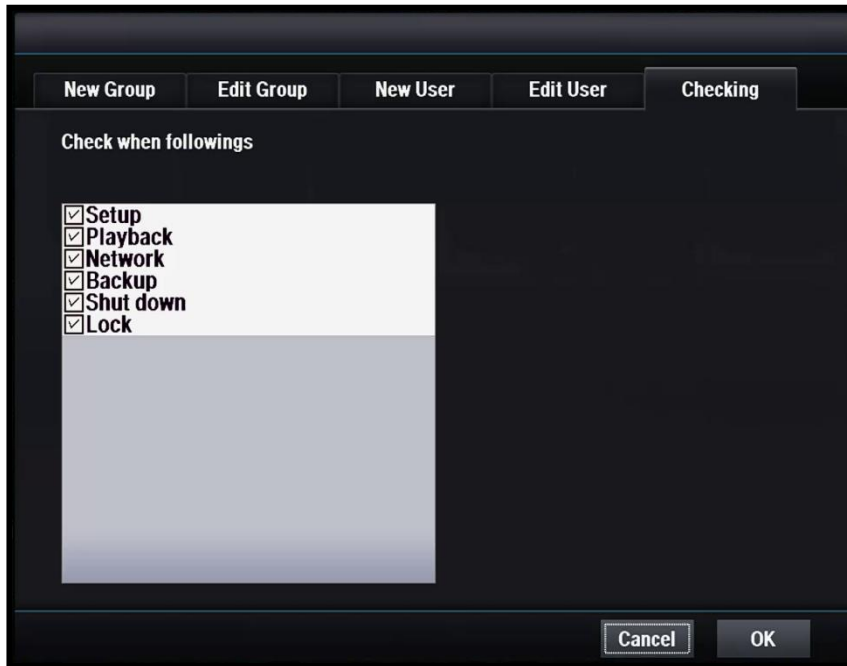

[Old Password]

- Type old password

[New Password]

- Type new password

4.2.2.5 Checking

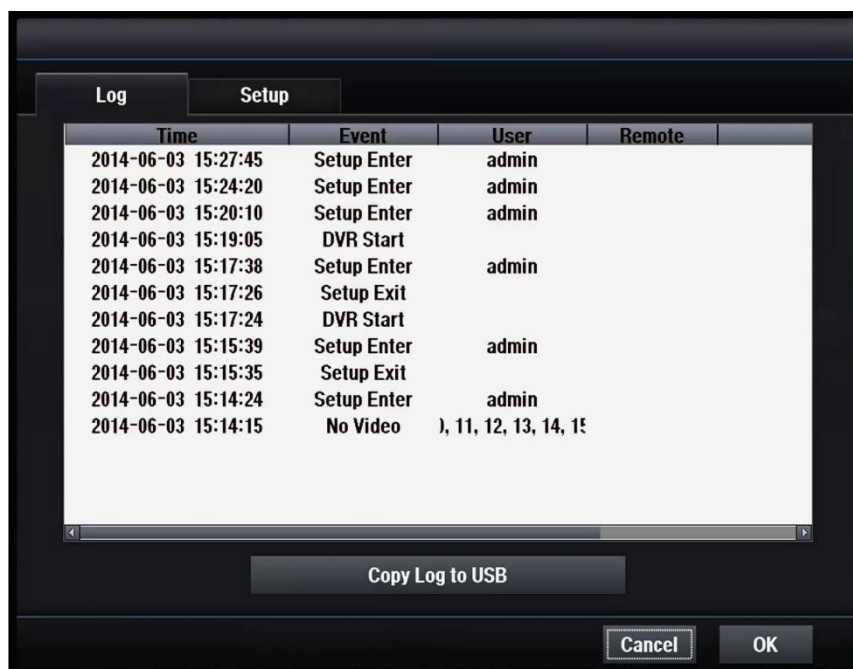

[Checking Setting]

- Select whether you will require ID & password or not.

4.2.3 Log

4.2.3.1 Log

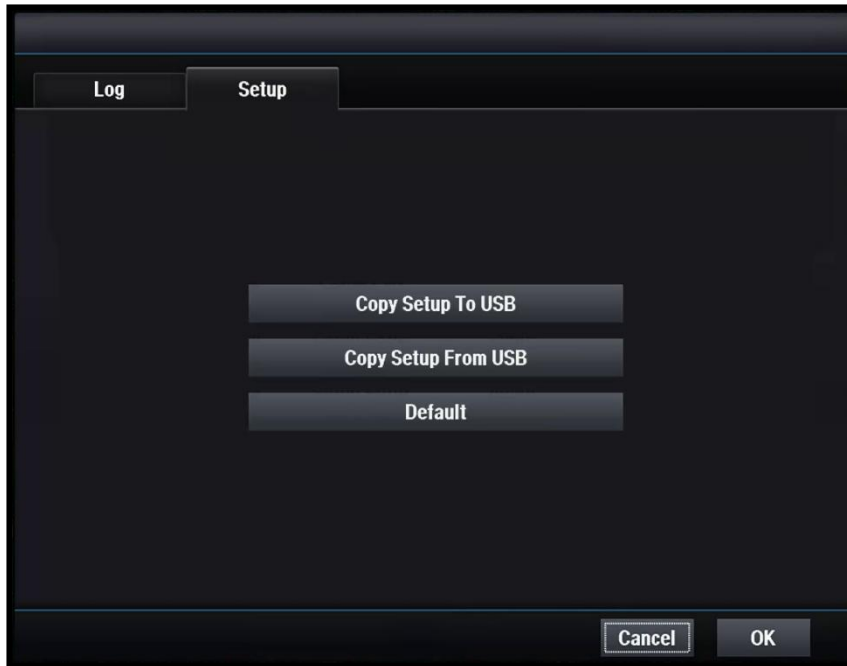

The screenshot shows a user interface with two tabs: 'Log' and 'Setup'. The 'Log' tab is active, displaying a table of system events. The table has five columns: 'Time', 'Event', 'User', and 'Remote'. The 'Remote' column is currently empty. Below the table is a 'Copy Log to USB' button, and at the bottom right are 'Cancel' and 'OK' buttons.

Time	Event	User	Remote
2014-06-03 15:27:45	Setup Enter	admin	
2014-06-03 15:24:20	Setup Enter	admin	
2014-06-03 15:20:10	Setup Enter	admin	
2014-06-03 15:19:05	DVR Start		
2014-06-03 15:17:38	Setup Enter	admin	
2014-06-03 15:17:26	Setup Exit		
2014-06-03 15:17:24	DVR Start		
2014-06-03 15:15:39	Setup Enter	admin	
2014-06-03 15:15:35	Setup Exit		
2014-06-03 15:14:24	Setup Enter	admin	
2014-06-03 15:14:15	No Video), 11, 12, 13, 14, 15	

[Copy Log to USB]

- Copy Log data to USB.

4.2.3.2 Setup

[Copy Setup To USB]

- Copy Setup data to USB

[Copy Setup From USB]

- Copy Setup data from USB to DVR

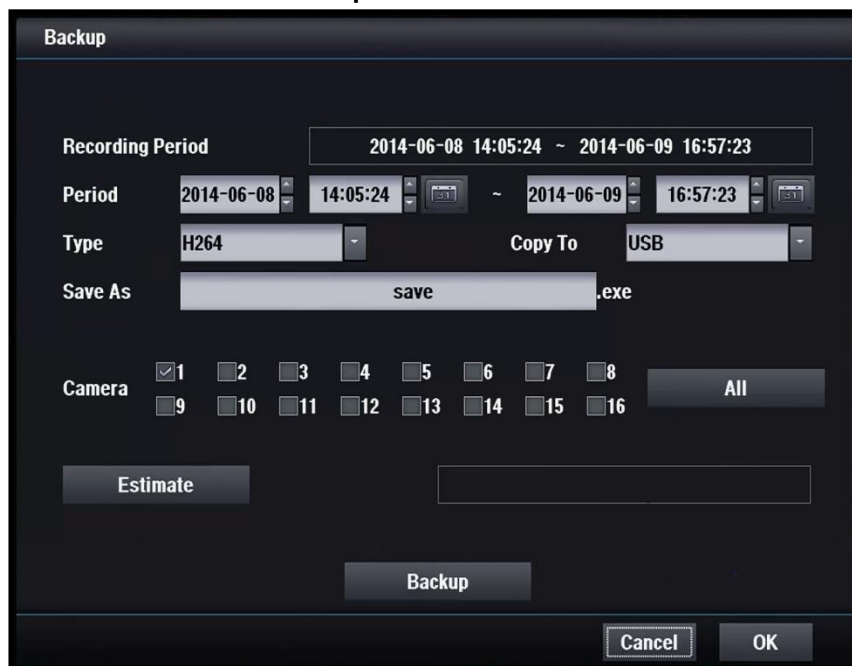

[Default]

- Set DVR setup information to factory default

4.2.4 Backup

4.2.4.1 H264 Backup

[H264 Backup]

- Backup video clip according to cameras selected and period set

[Recording Period]

- Show current recorded period

[Period]

- Set begin time and end time you want to backup

[Type]

- Select JPG or H264 as a backup file format

[Copy To]

- Set destination device

[Save As]

- Type filename

[Camera]

- Select cameras you want to backup

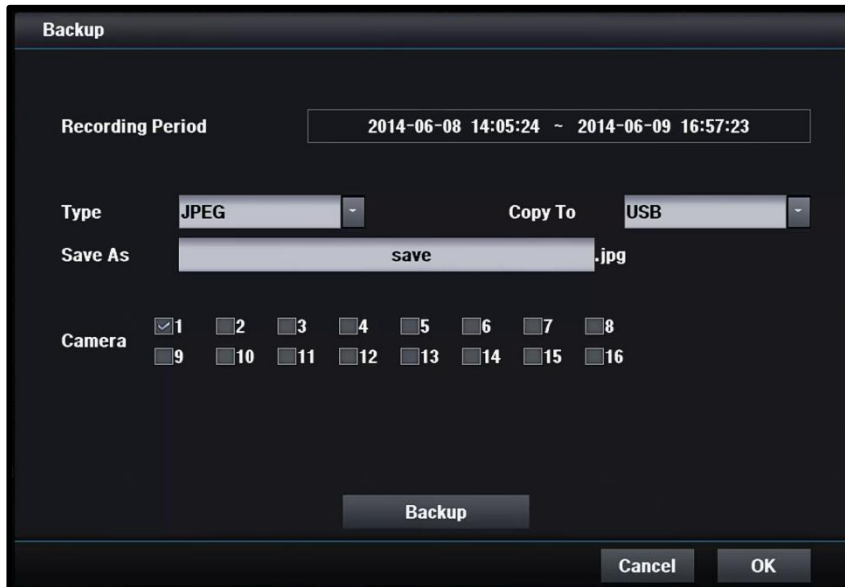

[Estimate]

- Estimate space needed for your backup

[Do backup]

- Start backup

4.2.4.2 JPG Backup

[JPG백업]

- Save current background image as JPG format

[Period]

- Set the start/end date and time.

[Copy to]

- Select a backup device, USB memory or CD/DVR-R

[Save as]

- Set the backup file name.

[Camera]

- Only 1 camera should be selected at the same time
- Only cameras existed in a current background split mode are available

[Do backup]

- Starts backup.

4.3 Recording

4.3.1 Setting

4.3.1.1 Camera

[Recording Type]

- Continue
 - Record continuously
- Event
 - Record only when event occur
- Pre-Event
 - Record data before event occur

[On]

- Enable/Disable camera

[Name]

- Type camera name

[Period]

- Set period for event/pre-event

[Resolution]

- Set recording size

[Frame]

- Set recording frame rate

[Quality]

- Set recording video quality

[Audio]

- Enable/Disable audio recording

[Fixed GOP]

-

4.3.1.2 PTZ

[On]

- Enable/Disable PTZ

[Protocol]

- Set PTZ protocol

[Databit]

- Set data bit

[ID]

- Set PTZ ID

[Baudrate]

- Set baud rate

[Stopbit]

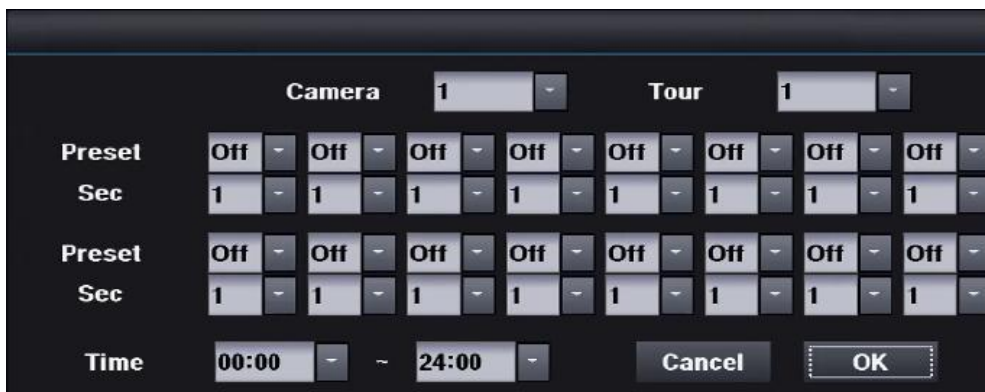

- Set stop bit

[Parity]

- Set parity bit

[Tour ...]

- DVR handle touring schedule without using camera's touring
- You can start touring by PTZ mode on the live screen mode

[Camera]

- Camera NO

[Preset]

- ON/OFF Preset

[Time]

- Set Time

[Tour]

- Tour NO

[Sec]

- Set Time

4.3.1.3 Keyboard

[On]

- Enable/Disable keyboard controller

[ID]

- Set keyboard ID

[Protocol]

- Set PTZ protocol

[Baudrate]

- Set baud rate

[Databit]

- Set data bit

[Stopbit]

- Set stop bit

[Parity]

- Set parity bit

4.3.1.4 Privacy

[No]

- Camera number

[Hidden]

- Hide each camera
- Hidden function hide whole camera.

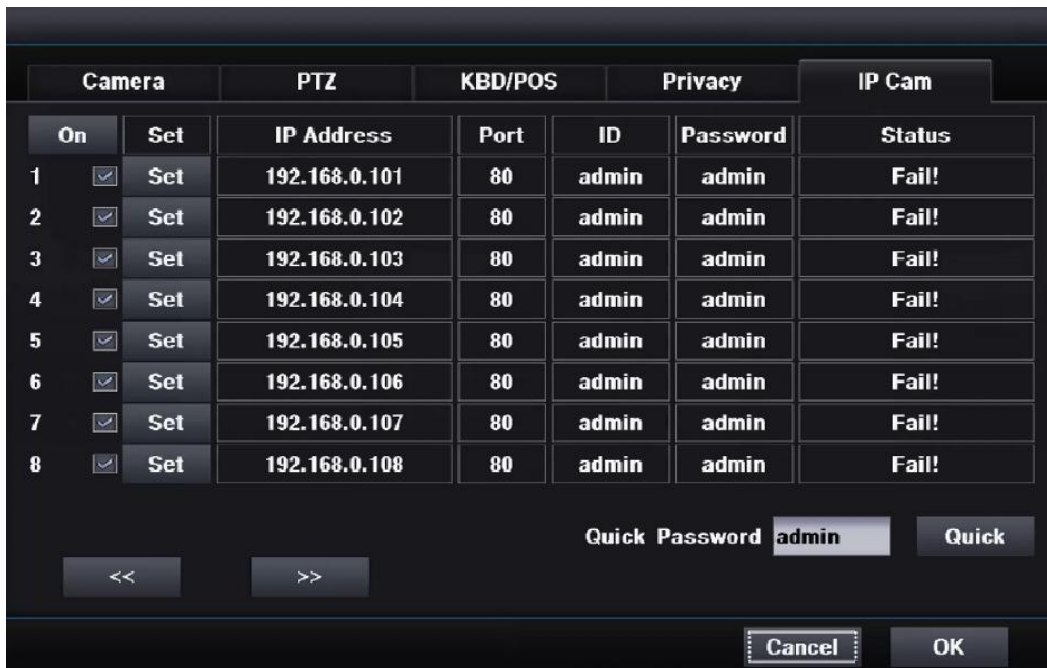

[Mosaic]

- Mosaic mask specific region with black color.
- In order to use Mosaic, first check Mosaic checkbox, set region as you want to mask

[Cut Days]

- For a private law, recording days is restricted by setting values.

4.3.1.5 IP Cam

[On]

- Enable/Disable Camera
- if you enable IP channel on, this channel is used only for IP cam regardless of HD or Analog coaxial video input connected.

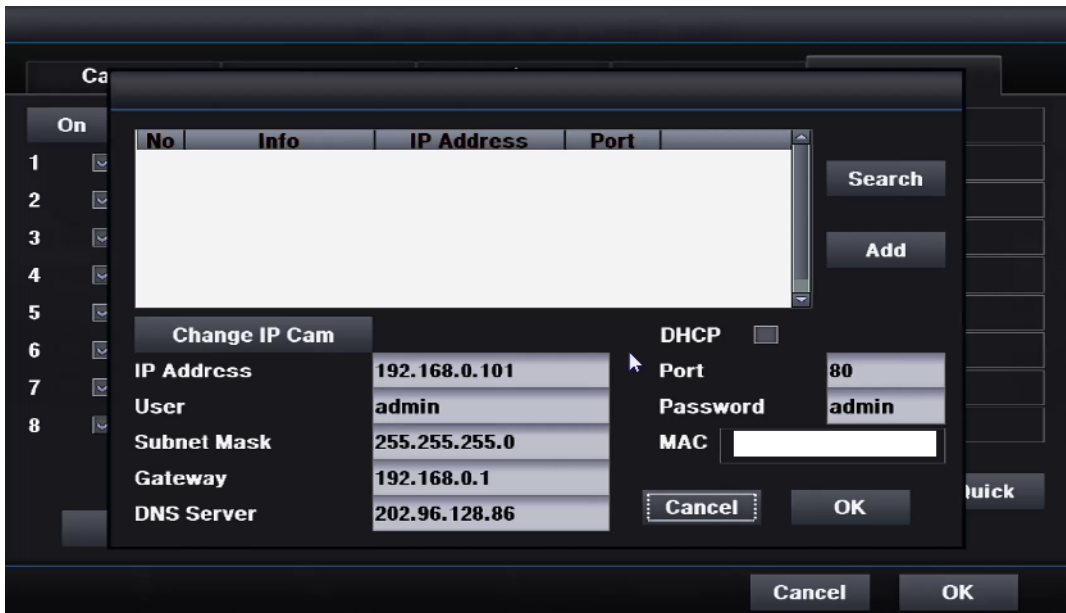

[Status]

- Shows "Success" when IP cam streaming is being transferred
- Basically, DVR try to get dual streaming from IP cam. If DVR succeed to get two streaming, it show "Success". If not, it shows "Fail"
- streaming is transferred after IP cam detection and communication. So "Success" message means all the things is successful.

[Quick]

- Quick button does following
 - Detect all IP cameras
 - Sort all IP cameras by IP address
 - Register each IP camera for each channel
 - Enable IP channel
- For Quick setting, DVR uses "Quick Password" for Quick processing. You should enter proper default password for your IP camera. Default is "admin"
- You can use drag and drop on the live screen after setting IP camera to change position of IP cameras

4.3.1.5.1 IP Cam Set

How to register IP cam

1. Select IP camera you want to assign to this channel
2. Click Add button
3. Enter User ID(“admin” is default for most iP cam)
4. Enter Password(“admin” or “12345” is default for most iP cam)
5. Click OK button

[DHCP]

- Set DHCP

[IP Address]

- Set IP

[User]

- Set User

[Search]

- Restart probing for IP camera
- Use this button only when some IP camera is not detected

[Subnet Mask]

- Set Subnet Mask

[Gateway]

- Set Gateway

[Add]

- Add selected IP cam to this channel

[DNS Server]

- Set DNS Server

[Change IP Cam]

- Change IP address of IP cam.
- It is recommended you use additional tools to change IP address of IP cams
- Additional tools for IP cam is provided by CD-ROM
- If you want to this function, you should contact to our technical team.

[Port]

- Set Port

[Password]

- Set Password

4.3.2 Motion

[No]

- Camera number

[Sensitivity]

- Select motion sensitivity

[All Area]

- Select all area as a motion detection area

[Set]

- Set motion detection area

4.3.2.1 Motion Area Setting

[Set All]

- Select All region

[Clear All]

- Clear All region

[Copy to All]

- Copy this region set to all other channels.

[Save & Exit]

- Exit after saving this region

[Exit]

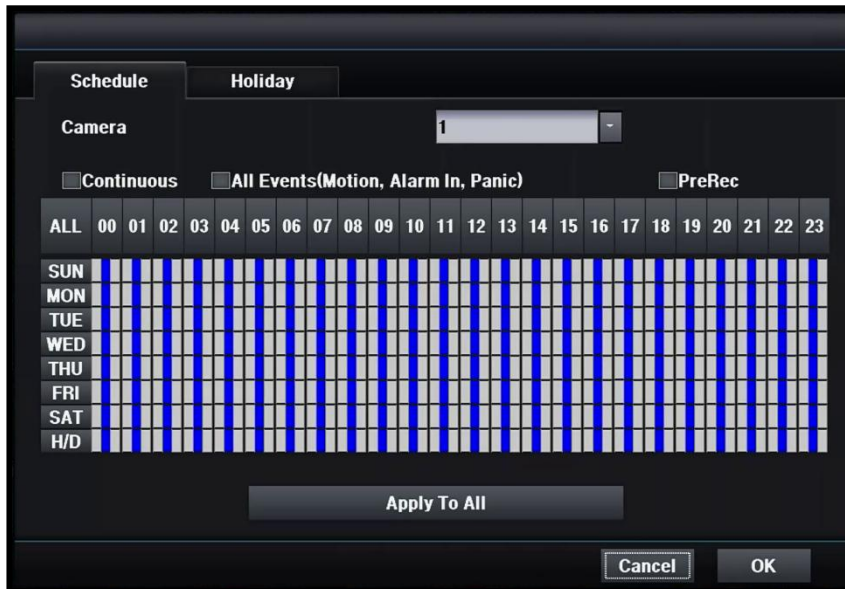

- Exit without saving this region

[Cancel]

- Close window

4.3.3 Schedule

4.3.3.1 Schedule

- You can set the schedule by hour, week, holiday

[Camera]

- Select camera you want to set

[Continuous]

- Record camera continuously
- Set the schedule continuously

[All events]

- Record camera only when event occurs
- Set the schedule by event

[PreRec]

- Record camera before event occurs
- Set the schedule by pre-event
(PreRec can be selected only with other event mode.)

[Apply To All]

- Apply current setting to all other cameras

[Hours : 00 ~ 23]

- Apply selected mode to selected hours

[Weekday : Sun ~ Sat, Holiday]

- Apply selected mode to selected weekday
- Holiday is selected by 4.3.3.2

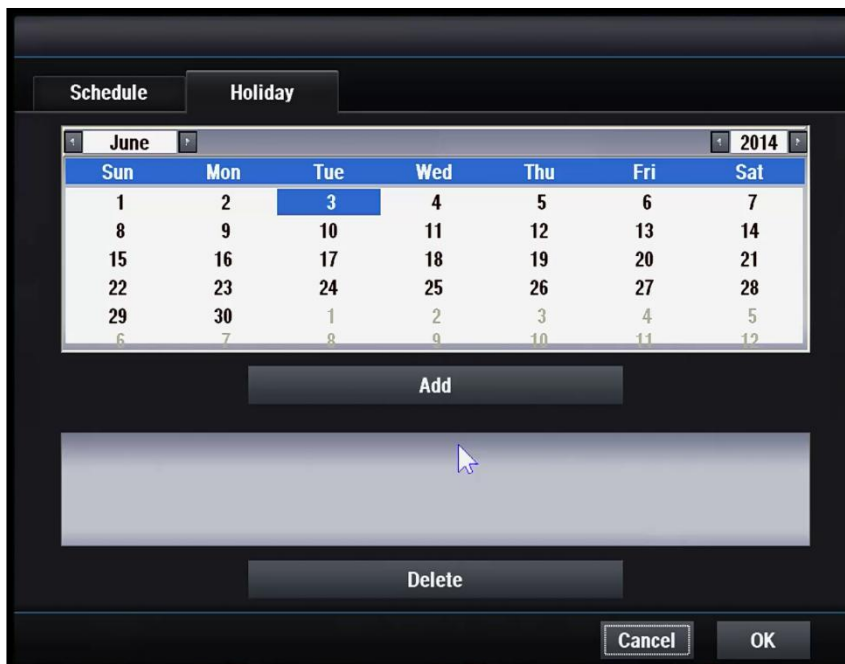

[Apply To All]

- Apply current setting to all other cameras

[No Recording]

- No recording when this is checked
- Only live monitoring is available when this is checked

4.3.3.2 Holiday

[Add]

- Add new holiday

[Delete]

- Delete selected holiday

4.4 Network

4.4.1 General

4.4.1.1 Setting

The screenshot shows a network configuration window titled "Day Light Saving". It features a list of settings on the left and their corresponding input fields on the right. The "Static/DHCP" setting is currently set to "DHCP". Below the list are three dropdown menus: "Transmission Method" set to "By Speed", "Fps" set to "25", and "Quality" set to "BEST". At the bottom are "Prev", "Cancel", and "Next" buttons.

Setting	Value
Static/DHCP	DHCP
IP Address	
Subnet Mask	
Gateway	
DNS Server	
TCP Port	
UDP Port	
HTTP Port	
Transmission Method	By Speed
Fps	25
Quality	BEST

[STATIC/DHCP]

- STATIC
 - Set network to static mode
- DHCP
 - Set network to DHCP mode

[IP Address]

- Set IP address
- Auto detected for DHCP mode

[Subnet Mask]

- Set subnet mask
- Auto detected for DHCP mode

[Gateway]

- Set gateway address
- Auto detected for DHCP mode

[DNS Server]

- Set DNS server address
- Auto detected for DHCP mode

[TCP Port]

- Set TCP port number
- Default is 7080

[UDP Port]

- Set TCP port number
- Default is 7081

[HTTP Port]

- Set HTTP port number
- Default is 80

[Transmission Method]

- Select By Quality if you want to high quality
- Select By Speed if you want to high transmission speed

[Fps]

- Frames for network transmission

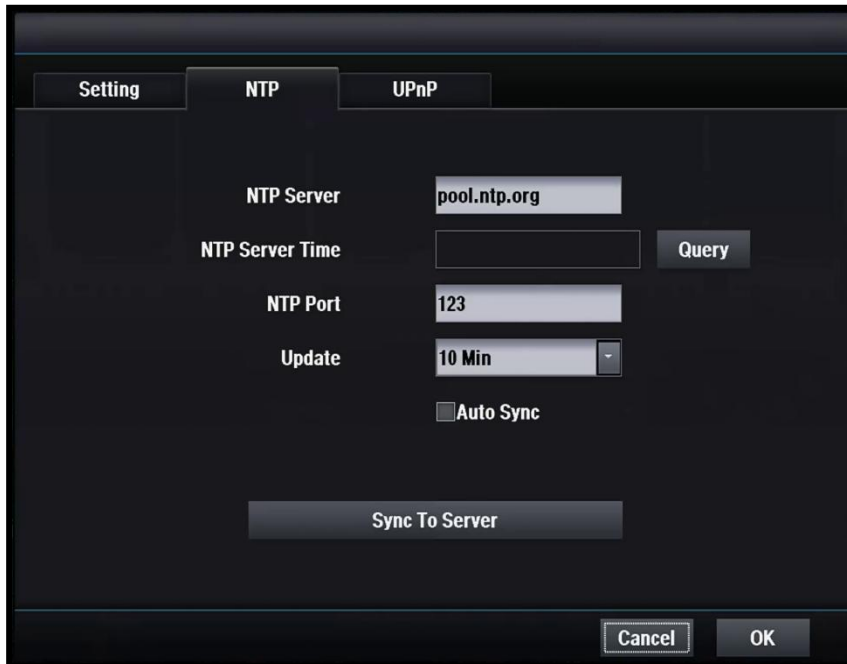

[Quality]

- Quality for network transmission

▪[MAC]

- MAC ADDRESS

4.4.1.2 NTP

[NTP Server]

- Type NTP server name

[NTP Server Time]

- [Query] Click button and NTP server time is displayed

[NTP Port]

- Set NTP port number
- Default is 123

[Update]

- Set auto update time interval

[Auto Sync]

- Select whether you use auto sync

[Sync To Server]

- Sync DVR time to NTP server time

4.4.1.3 UPnP

[UPnP]

- Click button and UPnP function is enabled

4.4.2 DDNS

The screenshot shows a configuration window for DDNS. The window title is 'DDNS'. It features a tab labeled 'DDNS'. The configuration options are as follows:

- DDNS Server Type:** A dropdown menu with 'nsddns.org' selected.
- Auto Sync:** A checkbox that is currently unchecked.
- DDNS Server:** An empty text input field.
- DDNS Port:** A text input field containing the value '9438'.
- User Domain Name:** An empty text input field.
- System Domain Name:** An empty text input field.
- User:** An empty text input field.
- Password:** An empty text input field.
- Key:** A long, empty text input field.

At the bottom of the window, there are three buttons: 'Check', 'Cancel', and 'OK'.

[DDNS Server Type]

- Set the DDNS Server Type
- Needed to register only when use user defined DDNS server
- Available DDNS servers
 - nsddns.org, dyndns.org, no-ip.com., zoneedit.com, freedns.afraid.org

[DDNS Server]

- Enter the DDNS Server address

[DDNS Port]

- Enter the port number to access to the DDNS server
- The default port is 9438

[User Domain Name]

- Enter the User Domain Name

[System Domain Name]

- Enter the System Domain Name you need when you want to connect via network

[User]

- Enter the User ID to access to the DDNS server

[Password]

- Enter the User password to access to the DDNS server

[Key]

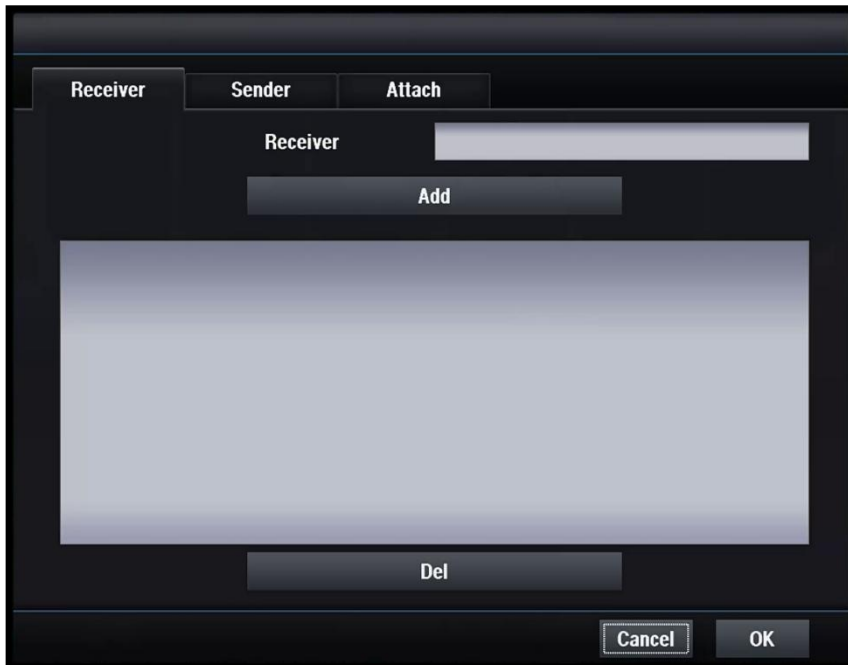

- Need the connection certificate key value if use the freeDNS

[Do Check]

- Verify availability of DDNS server setting

4.4.3 E-Mail

4.4.3.1 Receiver

[Receiver]

- Type Receiver email address

[Add]

- Add new receiver

[Del]

- Delete selected receiver

4.4.3.2 Sender

The screenshot shows a configuration window with three tabs: 'Receiver', 'Sender', and 'Attach'. The 'Sender' tab is selected. The configuration options are as follows:

Field	Value
SMTP Server Type	mail.nsddns.org
SMTP Server	
SMTP Port	587
Use SSL Connection	<input type="checkbox"/>
User	
Password	

Buttons: Cancel, OK

[SMTP Server Type]

- Select SMTP server type

[SMTP Server]

- Type SMTP server address

[SMTP Port]

- Set SMTP Port number

[SSL]

- Check if your SMTP server supports SSL

[User]

- Type user name

[Password]

- Type password

4.4.3.3 Attachment

[Email Attachment]

- Set attach type for email
- None : No file attached when email
- JPG : JPG capture image attached sent when email

[Email allowance hours]

- You can set the hours when you want to receive email
- Email is not sent for hours which are not selected.

4.5 Alarm

4.5.1 Alarm

4.5.1.1 Alarm In

The screenshot shows a configuration window for 'Alarm In'. It has two tabs: 'Alarm In' and 'Alarm Out'. The 'Alarm In' tab is selected. The window contains the following elements:

- Alarm In:** A dropdown menu showing '1' and a checked 'Enabled' checkbox.
- Camera:** A grid of checkboxes for cameras 1 through 16. Camera 1 is checked.
- Alarm Out:** A grid of checkboxes for alarm out triggers 1 through 16.
- Buzzer:** A checkbox that is currently unchecked.
- Full Screen:** A checkbox that is currently unchecked.
- E-Mail:** A checkbox that is currently unchecked.
- Buttons:** 'Apply To All', 'Cancel', and 'OK' buttons.

[Alarm In]

4.6.4.2 4 Division

The screenshot shows a configuration window for a 4-division camera setup. The window has three tabs: '1 Div', '4 Div' (selected), and '9 Div'. The '4 Div' tab is active, showing four pages of camera selection. Each page has a 'Camera' section with 16 checkboxes and a 'Period' section with a dropdown menu. The 'Camera' checkboxes are arranged in two rows of eight. The 'Period' dropdown menu is set to '3'. The 'OK' button is highlighted.
